

EcoClean

Targets the Real Problem

Most urinal and toilet systems simply mask odours with fragrance, whereas the EcoClean system targets the real problem which is scale buildup.

Why outsource urinal and toilet care?

Prevent Odours

Urinals and toilets are a major contributor to washroom odours. Ensure a pleasant user experience by breaking down odour-causing compounds.

Protect Fixtures

Scale build-up can cause staining on fixtures, costly plumbing repairs, and allows odour-causing and infectious bacteria to flourish.

Make a Positive Impression

Washrooms are small, but make a big impression. Ensure your visitors have a good user experience and positive association with your business.

Reliable, Hassle-Free Service

Our expert technicians ensure that your washroom users are cared for, with on-time, reliable refill services.

Product Overview

Advanced Dispensing Technology

- The EcoClean system is installed above each urinal/toilet with a direct feed line into the fixture
- At regular intervals and independent of the flushing system, the EcoClean dispenser injects directly into the sparge pipe providing continuous, cost effective treatment of toilets, urinals and plumbing lines

An Innovative, Biologically Based Solution

Our specially formulated and proprietary urinal and toilet treatment, EcoClean, interrupts scale formation and controls the growth of bacteria that can cause malodours, leaving behind a subtle fresh scent.

Options & Specifications

- Dimensions:** 8.7" x 4.9 x 3.9" (H x W x D)
Fragrance Options: 4 Distinct Scents / Fragrance Free
Power: 2D Batteries, included
Sustainability: Unit recycled at end of useful life
